

DATA366 - Introduction to Multivariate Statistics

General

Course Description

This course covers statistical methods used for analysis of data sets that contain more than one variable. Topics include multivariate normal distribution, covariance, inference about a mean vector, MANOVA, regression, and classification.

Min Units:

3

Max Units:

3

Repeatable for Credit:

No

Total Completions Allowed:

1

Total Units Allowed:

3

Grading Basis

GRD - Regular Grades A, B, C, D, E

Career

Undergraduate

Enrollment Requirements

019171 - Linear Algebra (MATH 313 or DATA/MATH 412) and DATA/MATH 363.

Component

Lecture

Workload Hours

3

Optional Component

No
